

Hvordan aktivere Skolon Teams-app i menyraden

Ulf Kronsell - 2022-01-07 - Innstillinger for skolen

I denne artikkelen viser vi hvordan du som administrator kan aktivere Skolons Teams-app i menyraden.

Velg "Teams apps" i menyen til venstre - så velger du "Manage apps". Her vil alle appene som finnes tilgjengelig i tenanten dukke opp. Her kan du også tillate eller blokkere apper i Microsoft Teams.

Videre trykker du på **Setup policies**, her kan du sette opp policy for hvilke brukere som skal ha appen for denne skolen. Du velger hvilken gruppe du ønsker, og trykker på "Add apps"

Her søker du etter Skolon. Deretter kan du tildele appen.

Policies installeres i dag på brukernivå.

The screenshot displays the Microsoft Teams admin center interface. On the left is a navigation sidebar with categories like Dashboard, Teams, Devices, Locations, Users, Meetings, Messaging policies, Teams apps, Manage apps, Permission policies, Setup policies, Voice, Policy packages, Analytics & reports, Assignments, Org-wide settings, Planning, Legacy portal, and Call quality dashboard. The main content area is for user 'Adele Vance', showing her profile picture, name, role (STUDENT), location (United States), email (Adele.V@M365EDU099957.On.Microsoft.com), and directory status. There are three summary cards: '7-DAY QUALITY' (Data isn't available), '7-DAY ACTIVITY' (0 Meetings, 0 Calls), and 'Assigned policies' (a list of 10 policies, all 'Global (Org-wide default)', highlighted with a red dashed box). A 'Policy package' section shows 'None' assigned. A 'Give feedback' button is in the bottom right.

Script behøves for å installere policies.
