

## Hvordan aktivere Skolon Teams-app i menyraden

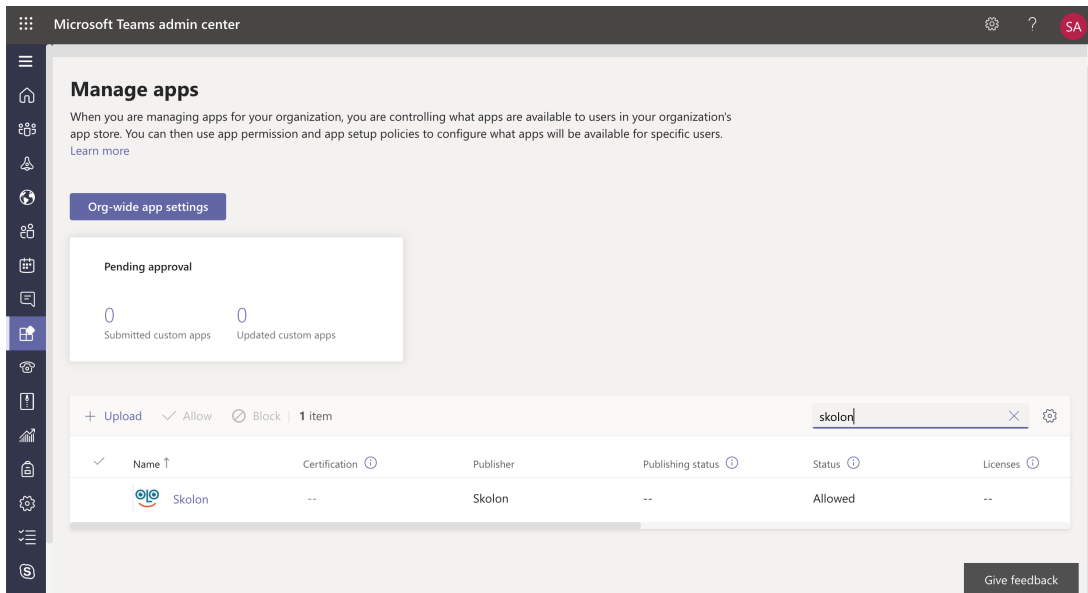

Ulf Kronsell - 2022-01-07 - Innstillinger for skolen

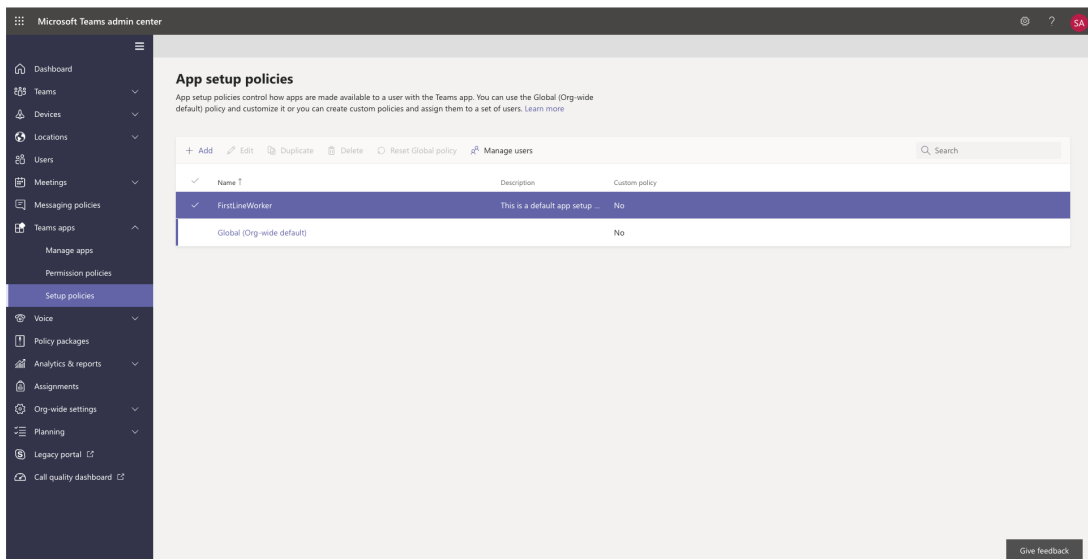

I denne artikkelen viser vi hvordan du som administrator kan aktivere Skolons Teams-app i menyraden.

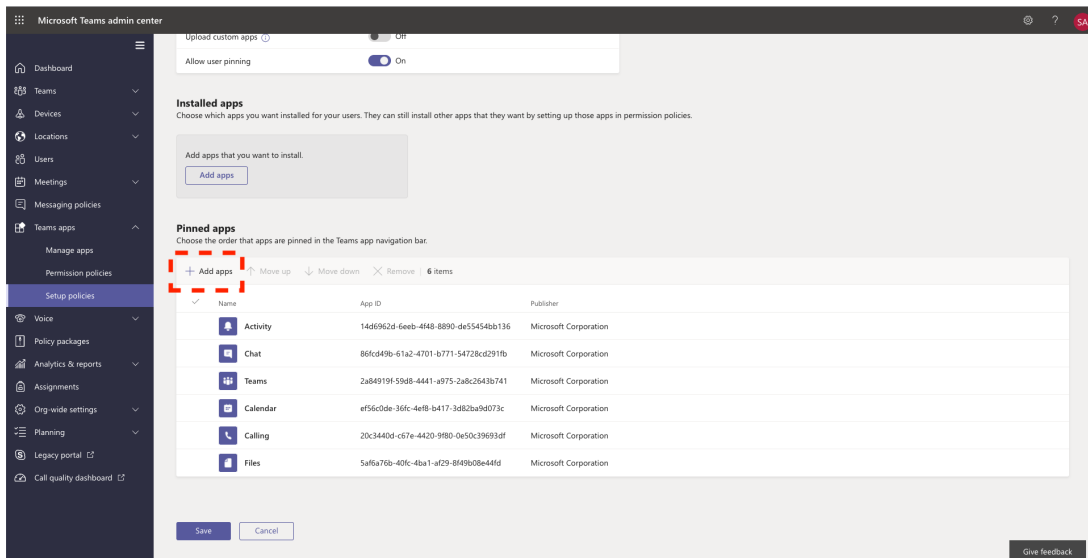

Velg "Teams apps" i menyen til venstre - så velger du "Manage apps". Her vil alle appene som finnes tilgjengelig i tenanten dukke opp. Her kan du også tillate eller blokkere apper i Microsoft Teams.

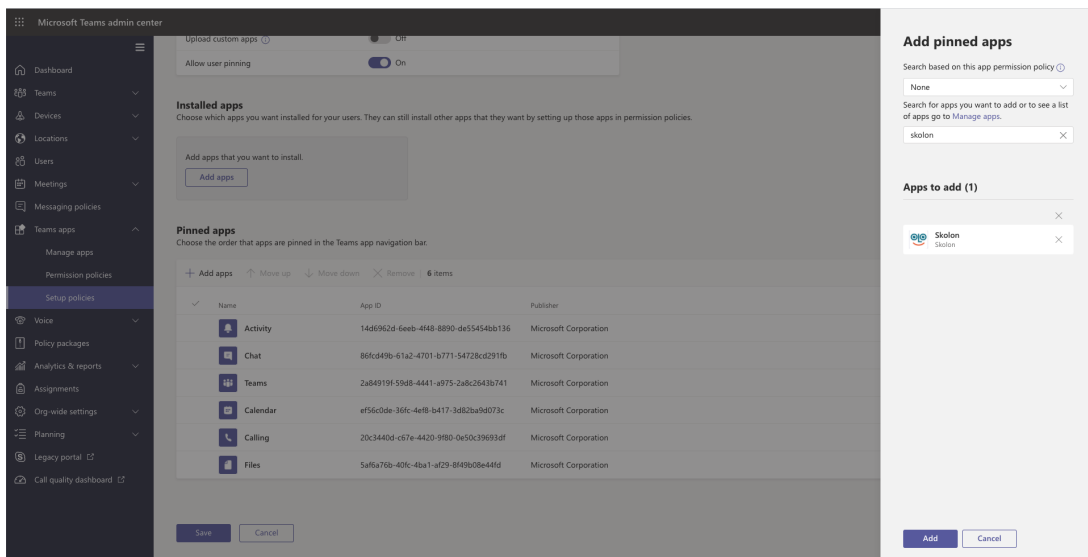

Videre trykker du på **Setup policies**, her kan du sette opp policy for hvilke brukere som skal ha appen for denne skolen. Du velger hvilken gruppe du ønsker, og trykker på "Add apps"

Her søker du etter Skolon. Deretter kan du tildele appen.

Policies installeres i dag på brukernivå.

The screenshot displays the Microsoft Teams admin center interface. On the left is a navigation pane with categories like Dashboard, Teams, Devices, Locations, Users, Meetings, Messaging policies, Teams apps, Manage apps, Permission policies, Setup policies, Voice, Policy packages, Analytics & reports, Assignments, Org-wide settings, Planning, Legacy portal, and Call quality dashboard. The main content area is for user 'Adele Vance' (STUDENT, United States). It shows a profile card with a photo, contact info (Email: Adele.V@M365EDU099957.On, Microsoft.com), and 7-day activity (0 Meetings, 0 Calls). Below this are tabs for Account, Voice, Call history, and Policies. The Policies tab is active, showing a list of 'Assigned policies' (Meeting, Messaging, Live events, App permission, App setup, Call park, Calling) all set to 'Global (Org-wide default)'. A 'Policy package' section shows 'None' is assigned. A red dashed box highlights the 'Assigned policies' list.

Script behøves for å installere policies.
