

## Hvordan aktivere Skolon Teams-app i menyraden

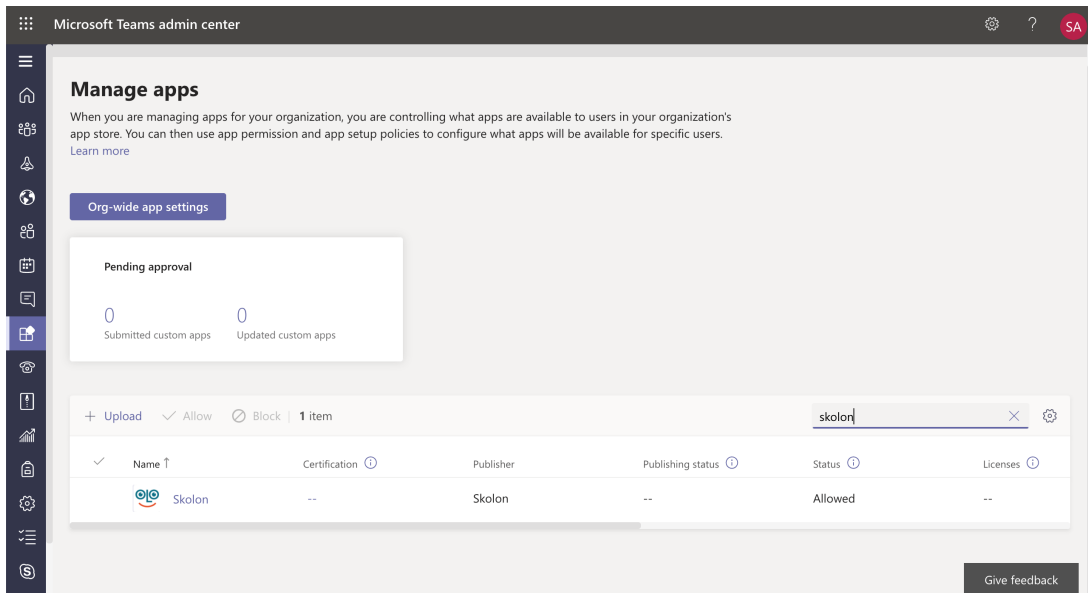

Ulf Kronsell - 2022-01-07 - Innstillinger for skolen

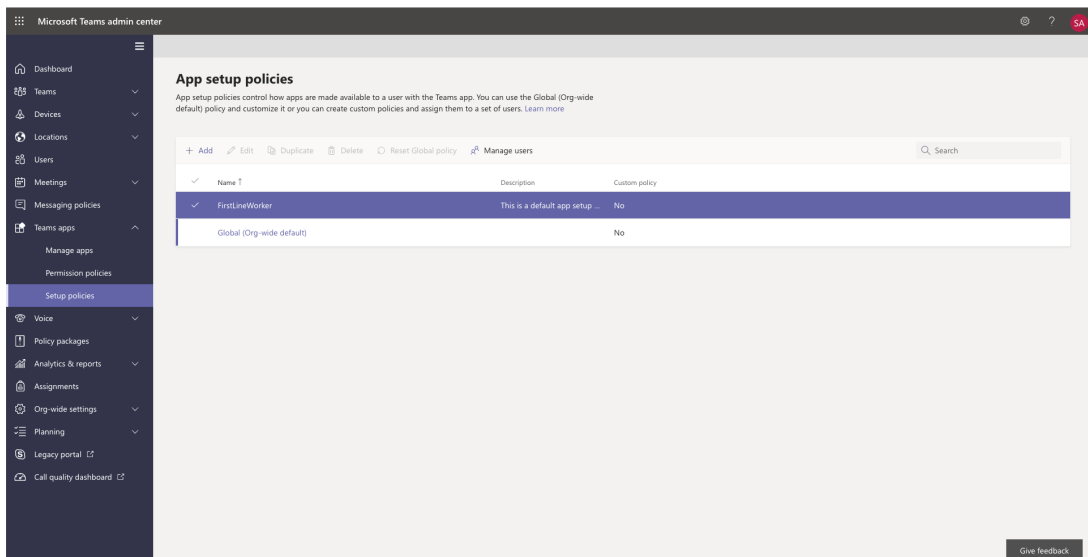

I denne artikkelen viser vi hvordan du som administrator kan aktivere Skolons Teams-app i menyraden.

Velg "Teams apps" i menyen til venstre - så velger du "Manage apps". Her vil alle appene som finnes tilgjengelig i tenanten dukke opp. Her kan du også tillate eller blokkere apper i Microsoft Teams.

Videre trykker du på **Setup policies**, her kan du sette opp policy for hvilke brukere som skal ha appen for denne skolen. Du velger hvilken gruppe du ønsker, og trykker på "Add apps"

Her søker du etter Skolon. Deretter kan du tildele appen.

Policies installeres i dag på brukernivå.

The screenshot displays the Microsoft Teams admin center interface. On the left is a navigation sidebar with categories like Dashboard, Teams, Devices, Locations, Users, Meetings, Messaging policies, Teams apps, Manage apps, Permission policies, Setup policies, Voice, Policy packages, Analytics & reports, Assignments, Org-wide settings, Planning, Legacy portal, and Call quality dashboard. The main content area is for user 'Adele Vance', showing her profile picture, role as 'STUDENT', location 'United States', and email 'Adele.V@M365EDU099957.On.Microsoft.com'. It also includes '7-DAY QUALITY' and '7-DAY ACTIVITY' summary cards. Below the profile is a 'Policies' tab with a sub-section for 'Assigned policies' (highlighted with a red dashed box) listing various policies such as Meeting policy, Messaging policy, Live events policy, App permission policy, App setup policy, Call park policy, and Calling policy, all set to 'Global (Org-wide default)'. To the right of the assigned policies is a 'Policy package' section showing 'None' is assigned. A 'Give feedback' button is located in the bottom right corner.

Script behøves for å installere policies.
