

Hvordan aktivere Skolon Teams-app i menyraden

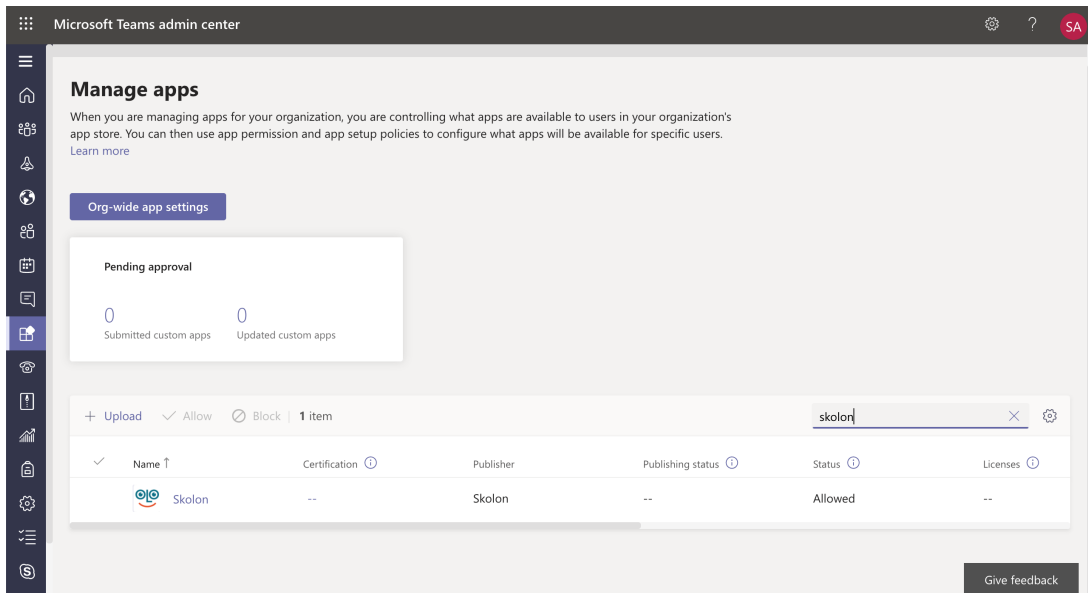

Ulf Kronsell - 2022-01-07 - Innstillinger for skolen

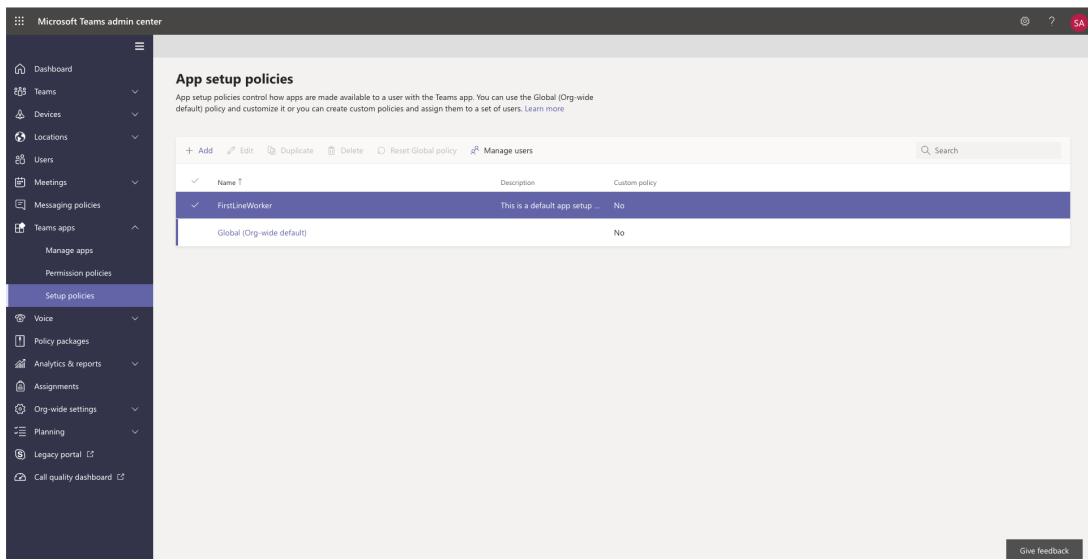

I denne artikkelen viser vi hvordan du som administrator kan aktivere Skolons Teams-app i menyraden.

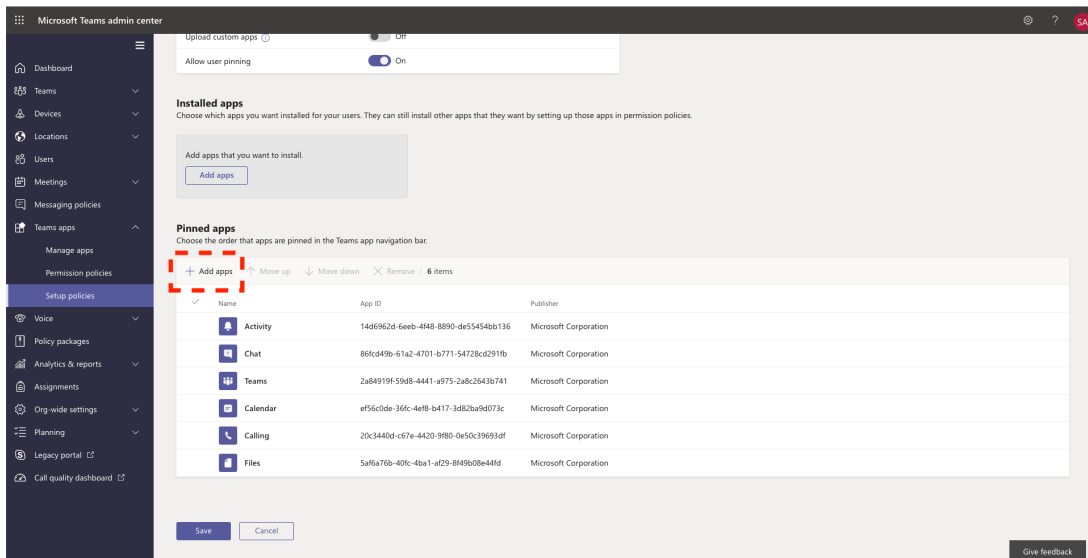

Velg "Teams apps" i menyen til venstre - så velger du "Manage apps". Her vil alle appene som finnes tilgjengelig i tenanten dukke opp. Her kan du også tillate eller blokkere apper i Microsoft Teams.

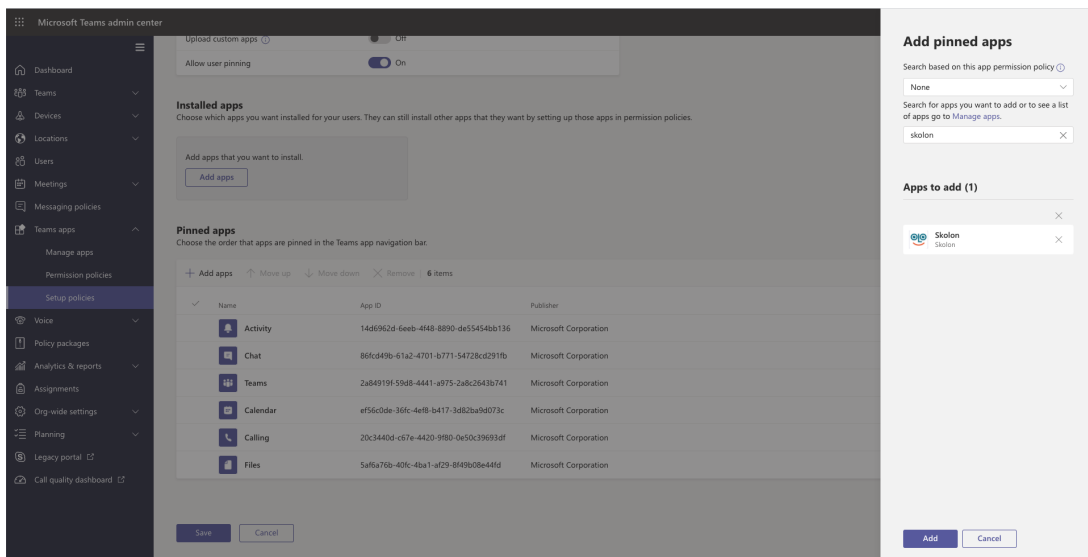

Videre trykker du på **Setup policies**, her kan du sette opp policy for hvilke brukere som skal ha appen for denne skolen. Du velger hvilken gruppe du ønsker, og trykker på "Add apps"

Her søker du etter Skolon. Deretter kan du tildele appen.

Policies installeres i dag på brukernivå.

The screenshot displays the Microsoft Teams admin center interface. On the left is a navigation sidebar with categories like Dashboard, Teams, Devices, Locations, Users, Meetings, Messaging policies, Teams apps, Manage apps, Permission policies, Setup policies, Voice, Policy packages, Analytics & reports, Assignments, Org-wide settings, Planning, Legacy portal, and Call quality dashboard. The main content area is for user 'Adele Vance', showing her profile picture, role as 'STUDENT', and contact information. It also features summary cards for '7-DAY QUALITY' (Data isn't available) and '7-DAY ACTIVITY' (0 Meetings, 0 Calls). Below this, the 'Policies' tab is active, showing a list of 'Assigned policies' (all 'Global (Org-wide default)') and a 'Policy package' section set to 'None'. A red dashed box highlights the 'Assigned policies' list.

Script behøves for å installere policies.
